

Exp. 2 Loading User Stories in Azure DevOps

AIM:

To create and load user stories using Azure DevOps.

TOOLS REQUIRED:

- Azure DevOps
- Web browser
- Microsoft account
- Planning Poker tool

PROCEDURE:

Step 1: Open Azure DevOps

- Go to Azure DevOps
- Sign in using your Microsoft account

Step 2: Create a Project

- Click on **New Project**
- Enter:
 - Project Name
 - Visibility (Public/Private)
- Click **Create**

Step 3: Navigate to Boards

- Select your project
- Click on **Boards** → **Backlogs**

Step 4: Create User Story

- Click on **+ New Work Item**
- Select **User Story**

Step 5: Enter Details

Fill the following:

- **Title:** Short name of the story
- **Description:**
As a user, I want [feature], so that [benefit]
- **Acceptance Criteria:** Conditions to satisfy
- **Priority:** Set importance

Step 6: Perform Planning Poker (Estimation)

- Gather team members (developers/testers)
- Each member is given Planning Poker cards (values like 1, 2, 3, 5, 8, 13...)
- Read the user story clearly
- Each member selects a card representing effort/complexity
- All reveal cards at the same time
- If values differ, discuss reasoning
- Repeat voting until consensus is reached
- Final value is assigned as Story Points in Azure DevOps

Step 7: Assign User Story

- Assign to a team member
- Set iteration/sprint if needed

Step 8: Save User Story

- Click **Save & Close**

Step 9: Verify Loading

- Go to **Backlogs**
- Confirm user story is listed

SAMPLE USER STORIES:

- As a user, I want to log in so that I can access my account
- As a user, I want to view quiz questions so that I can attempt them
- As a user, I want to see my score so that I know my performance

RESULT:

Thus, user stories were successfully created and loaded into Azure DevOps.

Classification

Goal: To provide a secure, efficient, and user-friendly portal for citizens to apply for government schemes, ensuring data integrity and reducing administrative overhead.

Scope:

- Application Submission:** Frontend interface for users to select schemes and apply.
- Document Management:** Secure upload, storage, and retrieval of mandatory applicant documentation.
- Validation Engine:** Automated checks for completeness and data integrity at the time of submission.
- Duplicate Mitigation:** Business logic to identify and block redundant applications for the same scheme by the same individual.
