

Exp. 4 Uploading Activity Diagram in Azure DevOps Wiki

DEFINITION:

An **Activity Diagram** is a UML diagram that represents the flow of activities or actions in a system. It shows the sequence of steps from start to end.

PURPOSE:

- To model workflow of a system
- To show sequence of operations
- To represent decision-making and parallel processes

BASIC COMPONENTS (Notations):

1. Initial Node (Start)

- Represents the starting point of the process
- Drawn as a **filled black circle**

2. Activity / Action

- Represents a step or task in the process
- Drawn as a **rounded rectangle**

Example: Login, Select Quiz

3. Decision Node

- Represents a condition or branching (Yes/No)
- Drawn as a **diamond shape**

4. Control Flow

- Shows the direction of flow between activities
- Represented by **arrows**

5. Fork Node

- Splits the flow into parallel activities
- Drawn as a **thick horizontal/vertical bar**

6. Join Node

- Merges parallel activities
- Drawn as a **thick bar (same as fork)**

7. Final Node (End)

- Represents the end of the process
- Drawn as a **circle with a dot inside**
