

Exp. 5 Uploading Class Diagram in Azure DevOps Wiki

DEFINITION:

A **Class Diagram** is a UML diagram that represents the static structure of a system. It shows classes, their attributes, methods, and relationships between them.

PURPOSE:

- To represent the structure of a system
- To show relationships between classes
- To model object-oriented design

BASIC COMPONENTS (Notations):

1. Class

- Represents an entity in the system
- Drawn as a **rectangle divided into three parts**:
 - Class Name
 - Attributes
 - Methods

Example: User, Admin

2. Attributes

- Represents properties of a class
- Written inside the class box

Example: name, id, password

3. Methods (Operations)

- Represents functions of a class
- Written below attributes

Example: login(), register()

4. Association

- Shows relationship between classes
- Represented by a **straight line**

5. Aggregation

- Represents a “has-a” relationship (weak relationship)
- Shown by a **hollow diamond**

6. Composition

- Strong relationship (part of whole)
- Shown by a **filled diamond**

7. Inheritance (Generalization)

- Represents parent-child relationship
- Shown by an **arrow with hollow triangle**

HOW TO UPLOAD CLASS DIAGRAM

AIM:

To upload a Class Diagram in the Wiki using Azure DevOps.

TOOLS REQUIRED:

- Azure DevOps
- Web browser
- Class Diagram image (PNG/JPG)

PROCEDURE:

Step 1: Open Azure DevOps

- Go to Azure DevOps
- Sign in with your Microsoft account

Step 2: Select Project

- Choose your existing project from the dashboard

Step 3: Navigate to Wiki

- Click on **Wiki** from the left menu
- If Wiki is not created:
 - o Click **Create Wiki**
 - o Select **Project Wiki**

Step 4: Create New Page

- Click on **New Page**
- Enter **Class Diagram**

Step 5: Upload Diagram

- Click on **Insert Image (image icon)**
- Choose **Upload from Computer**
- Select the **Class Diagram file**
- Click **Upload**

Step 6: Save the Page

- Click **Save**

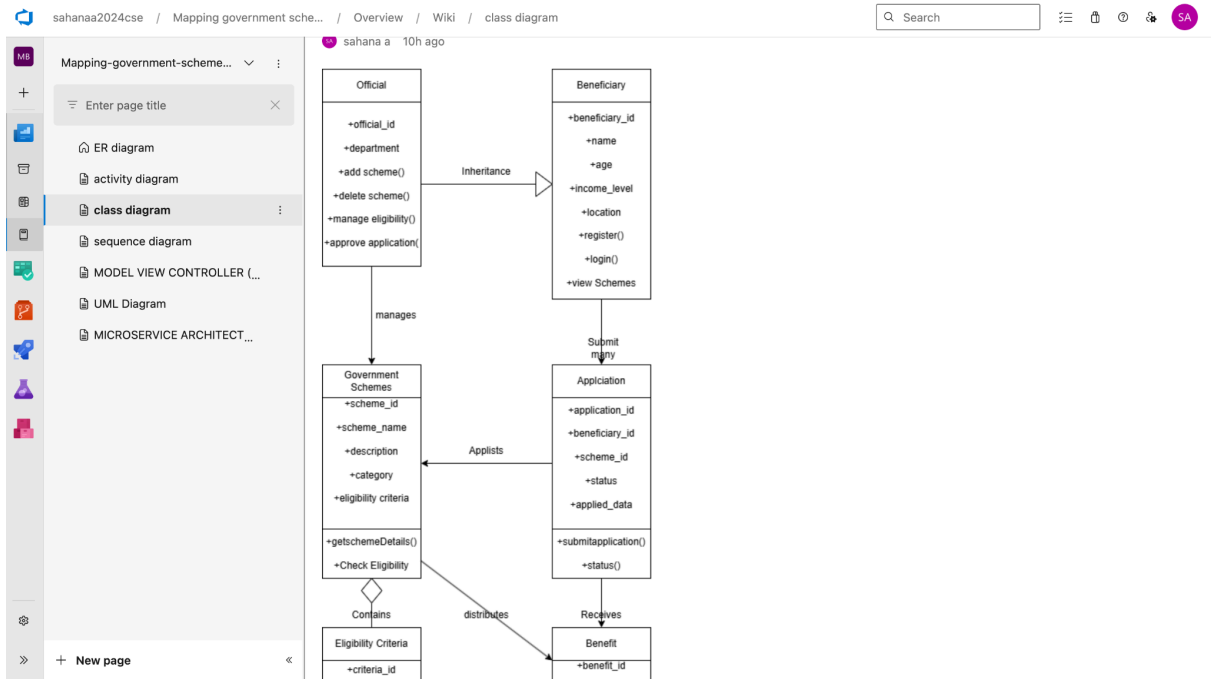

Step 7: Verify Upload

- Ensure the Class Diagram is displayed correctly

RESULT:

Thus, the Class Diagram was successfully uploaded to the Wiki using Azure DevOps.
